

FOUR-YEAR UNDERGRADUATE PROGRAMME (FYUP) in ENVIRONMENTAL SCIENCE (Under NEP 2020)

Program Outcome

The Environmental Science undergraduate program is a comprehensive and interdisciplinary course of study that equips students with the knowledge, skills, and perspectives necessary to address the complex environmental challenges facing our world today. The program covers topics such as environmental systems, policy and management, sustainability, and conservation, preparing graduates for careers as environmental consultants, sustainability specialists, conservation biologists, environmental policy analysts, and green technology specialists. Through fieldwork, research, internships, and community engagement, students gain practical experience and develop strong analytical, problem-solving, communication, and critical thinking skills. Upon completion, graduates possess a deep understanding of environmental principles, concepts, and real-world applications, enabling them to make a positive impact in their chosen careers.
